EXPERIENCE

ITSEC Asia · Jr. Offensive Security Consultant — Oct 2023 – Present
Offensive Security Consultant Intern, Feb – Aug 2023 — Jakarta, Indonesia

- Perform web application, API and infrastructure penetration tests and retests for banks, telcos, health insurers and universities in Indonesia, across white-, grey- and black-box engagements.
- Write English technical reports and walk client engineers and stakeholders through each risk and fix.
- Retest reported issues after remediation and confirm the fixes with client teams.

Synapsis.id · Backend Developer Intern — Nov 2022 – Feb 2023

- Built backend services in Go and MySQL, containerized with Docker, for a production-efficiency system used by a coal mining client in Kalimantan.
- Helped the client map its digital-transformation requirements, and built the company's portfolio site in Next.js.

Camp404 · Fullstack Web Developer Intern — Jan – Mar 2022

- Built a Laravel/MySQL CRUD app; sped up search by querying on demand instead of loading the full table.
- Taught HTML, CSS, PHP and SQL to 1,514 participants over Zoom and YouTube.

Widya Security · Cybersecurity Engineer Intern — Aug – Dec 2021

- Tested web apps with OWASP and ISSAF; an authorized slowloris DoS test kept the target down 16+ minutes.
- Captured encrypted chat traffic via man-in-the-middle for live forensics; published the paper as first author.

PROJECTS & PUBLICATIONS

Forenlog · Bash · undergraduate thesis — 2023
Forensic tool that finds XSS and DDoS traces in web server logs. Published in the UGM ETD Repository.

Analysis of Encrypted Network Traffic from a Secure Instant Messaging Application: A Case Study on Synology Chat — 2022
G. Y. Rasyad, D. Hariyadi, T. Febrianto. Jurnal Cybersecurity dan Forensik Digital, Vol. 5 No. 2.

Waduk Bendo IoT monitoring · PHP, ThingSpeak API — 2022
Real-time monitoring software for the Bendo reservoir, built for Yiqun Technology (Taiwan) and PLN.

CERTIFICATIONS & TRAINING

HTB Academy job-role paths completed: CPTS, CBBH, CWEE (web exploitation, Active Directory, pentest methodology). Preparing for OSCP and OSWE.

EDUCATION

Universitas Gadjah Mada · B.Eng. Information Engineering — Aug 2019 – Jul 2023

- Teaching assistant for Computer Security, IT Auditing and Risk Management, and Data Compression; lab assistant for Basic Programming, Object-Oriented Programming and IT Senior Project.
- Coursework: Software Engineering, Artificial Intelligence, Cloud Computing, Ethical Hacking, Digital Forensics.

LEADERSHIP

- Unit Coordinator, KKN-PPM UGM community service program (2023).
- Software Developer Lead, Technocorner tech event (2020–2021) · Vice President, Night Login Linux and networking community (2020–2021) · Front-end co-mentor, Ylabs (2021).

AWARDS

1st place, KMTETI CTF (2021) · Finalist, ELCCO Technology Creation Contest (2020)

SKILLS

Security	Web and API penetration testing, infrastructure testing, OWASP, ISSAF, digital forensics
Languages	Python, Go, JavaScript, PHP, Bash, SQL, Java
Tools	Docker, Git, MySQL, Laravel, Next.js
Spoken	Indonesian, Javanese, English
